Ali Akrami

CMC® Certified IT Management Consultant | IT Auditor | Software Engineer | Java Developer | Linux Lover | Microservices Architect

Tehran, Iran

Summary

I'm a passionate software engineer with over 18 years of programming experience, including more than 14 years dedicated to the software development, along with 4 years focused on software project management. My journey in tech has been fueled by a love for tackling complex challenges through code. I'm eager to expand.

My expertise includes:

- Full-Lifecycle Development: Proficient in systems integration, data migration, business reporting, analysis, design, and software development. Well-versed in Agile/Scrum methodologies.
- Backend Development: Extensive experience developing web services in Java, including both SOAP-based and RESTful APIs (with Spring Boot).
- Business Process Management (BPM): Over 5 years of experience leading development in Oracle Fusion Middleware (Oracle BPM, ADF, WebLogic Server), with a strong grasp of Business Process Analysis and SOA architecture.
- Key Strengths: Excellent analytical and problem-solving skills, combined with strong communication and requirement-gathering abilities to identify dependencies and ensure successful project delivery. A resourceful and committed quick learner, adept at rapidly adapting to new technologies and environments.
